31 JAN 1978

MEMORANDUM FOR: Director, National Foreign Assessment Center

FROM: Director of Central Intelligence

SUBJECT: Background Material for President Carter's Use
During President Tito's Visit to US

1. I just noted that President Tito is scheduled to visit the United States in March. I'd like to request that we make a very special effort to prepare a booklet on Tito and Yugoslavia for the President's use on this occasion. I recall that when I last briefed the President on Yugoslavia in the spring he was very interested and particularly responsive in the discussion. While I think he has a good general background on Yugoslavia, I think we could do a lot to help him prepare for the very specific discussions he will undoubtedly have with President Tito.

2. Some of the things I think we should include are:

3. Beyond that, I would like to make this an effort to respond to the President's expressed preference for Kiplinger Letter-type writing. If we're going to have this document utilized, it's got to be brief and readable. I'm also calling for a large quantitative order of data; let's see if we can't compromise between the two by using a cryptic semi-outline style.
